

## The Smart Solution for Hybrid Heating: Which Eternal Hybrid is Right for You?

The Eternal comes in three BTU sizes. The GU100 was designed for residential applications and it can be installed with a 1/2" gas line. The GU145 and GU195 are great for residential and commercial applications and require a 3/4" gas line. With the GU195M, you can common vent up to 4 units with SCH40 PVC and electronically link up to 8 units with a factory installed multi-controller for heavy commercial applications.

### PRODUCT SPECS\*

		GU100	GU145S	GU195S / GU195M
Thermal Efficiency Energy Factor		96% NG / 97% LP 0.94 Energy Factor	97% NG / 98% LP 0.95 Energy Factor	98% NG / 99% LP 0.96 Energy Factor
Installation		Indoor / Outdoor Wall Mount / Floor Standing		
Flue System		Sealed Combustion Direct Vent Power Vent Convertible		
Vent Run	3" PVC	Up to 100ft, 6 Elbows Max, 5ft Deduction Per Elbow		
	2" PVC	Up to 35ft, 3 Elbows Max, 5ft Deduction Per Elbow 2" PVC cannot be used at elevations above 4,000ft.		
Gas Type		Pre-set for NG, LP Conversion Kit Included		
Unit Connections	Gas	1/2" Female NPT	3/4" Female NPT	
	Water	3/4" Female NPT		
	Electricity	Dedicated 120VAC, 60Hz w/3 Pronged Power Cord		
Gas Input Rate	Min / Max	16,000 BTU/Hr / 100,000BTU/Hr	26,000 BTU/Hr / 145,000BTU/Hr	26,000BTU/Hr / 195,000BTU/Hr
Reserve Tank		Under 2 Gallons		
Electrical Consumption		Standby 8w Max 45w		Standby 8w Max 85w
Maximum Noise Level		under 35dB (a)	40dB (a)	50dB (a)
Remote Controller		Up to 3 kits		
GPM Capacity Range		0.1 to 10.0 GPM	0.1 to 14.5 GPM	0.1 to 19.5 GPM
Unit Dimensions (WxHxD)		16.9" x 29.1" x 13.8"		
Unit Weight		77lbs	90lbs / M Option - 91.5lbs	
Safety Devices		T&P Valve, Flame Rod, Thermal Fuse (306°F), Remaining Flame Detection, Fan RPM Check, Freeze Protection (-40°F), Vent Blockage Detection, Thermostat Switches (167°F / 194°F), Gas Valve Current Leak Detection, Ignition Prevention, Dipswitch Temperature Lock, GFCI w/2 x 5A Fuses

US Patent No 6,945,197 and others pending

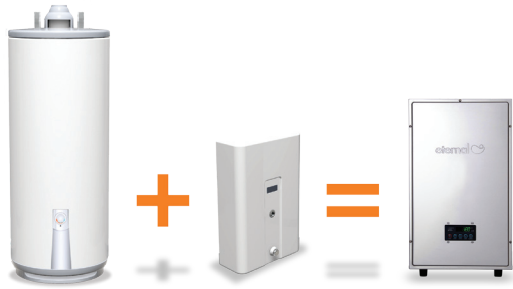

## The Eternal Hybrid Water Heater

### The Advantages Are Endless

With the Eternal hybrid water heater, you get endless hot water without sacrificing water pressure. Its compact stainless steel design is up to 98% efficient, durable, and leaves almost no carbon footprint.

### What is a hybrid water heater?

**Tank + Tankless = Eternal**

The Eternal provides endless hot water like a tankless, but has about 2 gallons of storage inside. Why is storage important? The buffer storage means hot water is ready when you need it. You do not have to wait for the water to heat up and waste energy when the hot water is not being used. Plus, you do not lose water pressure when running multiple fixtures and appliances. Therefore, you get the benefits of a tank and a tankless without having to worry about running out of hot water.

### How does it work?

With Eternal's unique patented counter flow design, cold water enters from the bottom while heat is pushed down from the top through radiating transfer pipes. As the water flows through the unit, heat is pushed in multiple directions to maximize the transfer of energy. The end result is a small, efficient heat exchanger that can replace multiple tanks and supply endless hot water.

### Can it support multiple applications?

All of the Eternal hybrid water heaters can support multiple applications. You can run the dishwasher, shower, and do the laundry at the same time. Select the Eternal that is right for you.

<b>Eternal GU100:</b> Residential only 144 Gallons per hour	Up to 2 applications 
<b>Eternal GU145:</b> Residential & Commercial 202 Gallons per hour	Up to 3 applications 
<b>Eternal GU195:</b> Residential & Commercial 282 Gallons per hour	Up to 4 applications 

\* Based on Department of Energy standard. Performance varies with ground temperature and fixture size. Visit [eternalwaterheater.com](http://eternalwaterheater.com) or call 866.946.1096 for more performance information.

### Does it have advanced features?

The Eternal has a digital display screen that allows you to adjust the temperature with ease. You can turn the hot water temperature up in the winter and turn it down in the summer. When you go on vacation, you can even turn the water heater off so you do not waste energy. The Eternal also has an optional remote control that allows you to change the temperature from a more convenient location.

### Will it save time & water?

Eternal is compatible with most recirculation systems, whether it's a dedicated return line or under-the-sink retrofit pump. The built-in reserve tank within the heat exchanger makes instant hot water possible. Sold separately. Consult your authorized Eternal dealer.

### Is it easy to install and maintain?

The Eternal must be installed by a licensed contractor with plumbing expertise. Since the Eternal features standard water connections on top, the unit can sit in the same space as a tank. It's small size and flexible design allows you to put the Eternal indoors, outdoors, wall mount or place it on the floor. Due to its patented self-cleaning design, the Eternal does not need a costly annual heat exchanger flushing which is often required for tankless. For more installation information, contact an authorized Eternal dealer near you.

### Will it help me save money?

The Eternal is an Energy Star appliance and is up to 98% thermal efficient which means for every dollar you pay for fuel, 98 cents is transferred to heat. Over time, the high efficiency can save your family time, energy, and money. Since the Eternal is an ENERGY STAR appliance, it qualifies for available government and/or local utility rebates.

### What type of warranty and support does Eternal offer?

Eternal comes with a 15 year residential / 5 year commercial no leak warranty.\* We stand by our product and will provide the support you need. Our U.S. based technical support representatives are available 24/7. Also, we have a national service network of Factory Authorized Service Technicians (F.A.S.T) that are available to install and service your Eternal hybrid water heater.

\*GU100 comes with a 15 year residential no leak warranty. It is not designed for commercial use.
